- Friday 11:00 - 13:00
- Friday 13:30 - 15:30

Description

In the software market since 2006, CustomSoft is noted on two business lines: e-commerce and custom software (web and mobile). CustomSoft is the creator of Eva e-commerce platform, a top application in this field in Romania, used by companies like evoMAG.ro, Storepedia.ro or TotulDespreMame.ro. Eva is the most effective e-commerce platform, with the main advantage of automating processes within sales, promotion and online marketing, as well as related logistics and stock management workflows. The platform is a support for both retailers and end customers, easily covering mobility needs, available on mobile devices as a responsive site, but also as a native mobile application. CustomSoft is specialized in developing business applications in areas such as e-commerce, automotive, retail, distribution, manufacturing and telecommunications. We try to approach each project starting from the customer's requirements, but filling with everything necessary so that the customer's expectations are always exceeded. We bring more value to our customers in the available budget. Well-developed internal procedures ensure high quality of analysis, development, testing and project management services. Our customers confirm this, each year choosing to work with us again. 30% of the new projects are our customers' with whom we have worked before, and 40% are recommended customers.
